

John

I am very pleased to say the install is complete and everything is going great. The system is operating exactly as you described it would. My guy's are real excited about the system and the way it is running. We just started Air Master this morning and already I am seeing a more stable PSI in the plant than before.

I wanted to take a minute to thank for all you help getting the project completed. I am not the most knowledgeable person when it comes to air compressors and controls. You did a great job of explaining everything to me in a way that I could understand. It was a pleasure working with you and your company. I also want to thank Air Relief. They too are an outstanding outfit and have great people representing them in the field.

I have two outstanding invoices that I will now sign for payment. Invoice # 5507 and invoice # 5510. I will wait till you confirm these as the only outstanding invoice before I send them to account payable.

John I saw your new logo on the second controller. I am told that you have really nice shirts and jackets with these logos on them. If by some chance you could part with some tee shirts for my guys that would be great. Thanks again for all the help and the great job !!!!
